Mahmoud Sameh

mahmoud@simak.ai | +966 545 370 163 | Madinah, Saudi Arabia | mahmoud-sameh.me
github.com/mah-sam | linkedin.com/in/mah-sam | kaggle.com/mah01sam/code

- **Electrical Engineering graduate (2025)**, **top of class** with a **4.95/5 GPA** from Islamic University of Madinah, looking for a graduate AI/ML engineering role; **IELTS Band 8.0**.
- Two full-time internships (**Aajil Fintech**, **KFUPM**) and the **Aramco & RDIA** AI Co-Innovation Program; research in foundation model adaptation, computer vision, and applied ML, with **three published papers** and **one under review**.
- Completed **KAUST Academy**'s AI program (2024) among the **top 100 nationally**; co-winner of **SDAIA's Enjaz Hackathon** (150K SAR prize); **2nd Best Graduation Project** in AI university-wide.
- **Building software since 2021**, trained through **Harvard CS50** and the **University of Michigan** Python Specialization, from ML models to full-stack web and mobile apps with automated CI/CD.

Education

Bachelor of Science (B.S.) in Electrical Engineering August 2020 – June 2025
Islamic University of Madinah, Madinah, Saudi Arabia

- GPA 4.95/5, top of class (Academic Record) (External Courses)
- Accredited Engineer, Saudi Council of Engineers (SCE) – Membership No. 1213941

Language Proficiency

Arabic: Native | **IELTS Academic:** Band **8.0** (L: 8.5, R: 8.5, W: 7.0, S: 7.0) (Certificate)
Duolingo (DET): 150/160 (Certificate)

Work Experience

AI Engineer (Full-time Internship) October 2025 – February 2026
Aajil Fintech Riyadh, Saudi Arabia (Hybrid)

- Built AI infrastructure to automate credit risk assessment, reducing manual review overhead.
- Developed a feature-engineering pipeline that generates financial analyses from raw application data.
- Trained and deployed classification/extraction models with end-to-end MLOps.
- Bridged SMEs and the AI team, translating domain feedback into actionable model improvements.

AI Co-Innovation Program September 2025
Aramco & RDIA Dhahran, Saudi Arabia (On-site)

- Participated in a month-long applied AI program focused on **methane and gas detection** from remote sensors.
- Investigated the use of **hyperspectral imaging** and deep learning for spectral-signature identification of fugitive emissions, building on prior HSI hardware/software experience at KFUPM.

Research Intern (Full-time Internship) June 2025 – August 2025
King Fahd University of Petroleum and Minerals Dhahran, Saudi Arabia (On-site)

- Designed a complete experimental protocol for a novel hyperspectral imaging dataset of date fruits, covering sample scanning, oven-drying ground truth, and data management.
- Developed the full software stack for the lab's push-broom HSI hardware, integrating camera control, stepper motor synchronization, and data acquisition into a single Python application.
- Created an open-source GUI (PyQt6) for hyperspectral data calibration, cube assembly, and analysis, published as a first-author paper in *SoftwareX* (doi: 10.1016/j.softx.2026.102680).

Engineering College Student Contributor (Part-time) April 2023 – June 2025
Islamic University of Madinah Madinah, Saudi Arabia (On-site)

- Led student teams on college-level technical projects, offering mentorship and coordination.
- Managed the Engineering College's social media and gave faculty student-representative feedback on program initiatives and curriculum.

Skills

AI/ML: Deep Learning, Foundation Models & VLMs, Transformers, Fine-Tuning & Transfer Learning, Computer Vision (Detection, Segmentation, Classification), Image Processing, LLM Agents (LangChain, LangGraph), RAG & Vector Databases, HPO, MLOps & Model Deployment
Languages & Libraries: Python (PyTorch, TensorFlow, Keras, scikit-learn, NumPy, Pandas, OpenCV), C, SQL, JavaScript, TypeScript, PHP, HTML/CSS
DevOps & Cloud: CI/CD (GitHub Actions), automated testing (pytest, PHPUnit, Jest), Docker, Linux, Nginx, Google Cloud (GCP), Firebase, Google Play Console, TestFlight
Tools: MATLAB/Simulink, Git, VS Code, Claude Code, Hugging Face, Django, FastAPI, Laravel, Next.js, React Native
Project Portfolio: Selected Projects

Courses

- KAUST Academy: Intro to AI & Advanced AI (Passed All 3 Stages) — January – June 2024
- Mathematics for ML & Data Science Specialization (2 Courses) — October 2023
- Deep Learning Specialization (5 Courses, deeplearning.ai) — August 2022 – August 2023
- Harvard CS50: AI with Python, Intro to CS, Understanding Technology — July 2021 – August 2022
- Michigan Python Specialization (5 Courses) — December 2020 – May 2021

Full list with certificates: Direct Link

Awards & Activities

- Acknowledgment of Academic Excellence (Certificate) — May 2025
- Letter of Appreciation, Control Lab Redesign (Letter) — April 2025
- KSU Engineering Day Competitions (Certificate) — February 2025
- Enjaz Hackathon, co-winner (Certificate 1) (Certificate 2) — January 2025
- WRO Saudi 2023 RoboSport (Certificate) — October 2023
